Machine Learning Models and Algorithms for Big Data Classification: Thinking with Examples for Effective Learning (Integrated Series in Information Systems) Shan Suthaharan

This book presents machine learning models and algorithms to address big data classification problems. Existing machine learning techniques like the decision tree (a hierarchical approach), random forest (an ensemble hierarchical approach), and deep learning (a layered approach) are highly suitable for the system that can handle such problems. This book helps readers, especially students and newcomers to the field of big data and machine learning, to gain a quick understanding of the techniques and technologies; therefore, the theory, examples, and programs (Matlab and R) presented in this book have been simplified, hardcoded, repeated, or spaced for improvements. They provide vehicles to test and understand the complicated concepts of various topics in the field. It is expected that the readers adopt these programs to experiment with the examples, and then modify or write their own programs toward advancing their knowledge for solving more complex and challenging problems.

The presentation format of this book focuses on simplicity, readability, and dependability so that both undergraduate and graduate students as well as new researchers, developers, and practitioners in this field can easily trust and grasp the concepts, and learn them effectively. It has been written to reduce the mathematical complexity and help the vast majority of readers to understand the topics and get interested in the field. This book consists of four parts, with the total of 14 chapters. The first part mainly focuses on the topics that are needed to help analyze and understand data and big data. The second part covers the topics that can explain the systems required for processing big data. The third part presents the topics required to understand and select machine learning techniques to classify big data. Finally, the fourth part concentrates on the topics that explain the scaling-up machine learning, an important solution for modern big data problems.

From reader reviews:

Catherine Riddle:

The book Machine Learning Models and Algorithms for Big Data Classification: Thinking with Examples for Effective Learning (Integrated Series in Information Systems) will bring you to the new experience of reading a book. The author style to explain the idea is very unique. Should you try to find new book you just read, this book very suitable to you. The book Machine Learning Models and Algorithms for Big Data Classification: Thinking with Examples for Effective Learning (Integrated Series in Information Systems) is much recommended to you to learn. You can also get the e-book from the official web site, so you can easier to read the book.

Helen Woodson:

Reading a book tends to be new life style within this era globalization. With studying you can get a lot of information that will give you benefit in your life. Together with book everyone in this world could share their idea. Books can also inspire a lot of people. Many author can inspire all their reader with their story or perhaps their experience. Not only the storyplot that share in the ebooks. But also they write about advantage about something that you need instance. How to get the good score toefl, or how to teach your children, there are many kinds of book that exist now. The authors these days always try to improve their talent in writing, they also doing some analysis before they write to their book. One of them is this Machine Learning Models and Algorithms for Big Data Classification: Thinking with Examples for Effective Learning (Integrated Series in Information Systems).

Lily Tarver:

This Machine Learning Models and Algorithms for Big Data Classification: Thinking with Examples for Effective Learning (Integrated Series in Information Systems) is brand new way for you who has curiosity to look for some information given it relief your hunger details. Getting deeper you onto it getting knowledge more you know or perhaps you who still having small amount of digest in reading this Machine Learning Models and Algorithms for Big Data Classification: Thinking with Examples for Effective Learning (Integrated Series in Information Systems) can be the light food for yourself because the information inside that book is easy to get by means of anyone. These books acquire itself in the form that is certainly reachable by anyone, sure I mean in the e-book form. People who think that in reserve form make them feel sleepy even dizzy this guide is the answer. So there isn't any in reading a book especially this one. You can find what you are looking for. It should be here for you actually. So , don't miss the idea! Just read this e-book type for your better life along with knowledge.

Jimmy Dolce:

Don't be worry when you are afraid that this book will filled the space in your house, you might have it in e-

book approach, more simple and reachable. This kind of Machine Learning Models and Algorithms for Big Data Classification: Thinking with Examples for Effective Learning (Integrated Series in Information Systems) can give you a lot of close friends because by you investigating this one book you have thing that they don't and make you more like an interesting person. This kind of book can be one of one step for you to get success. This guide offer you information that might be your friend doesn't realize, by knowing more than some other make you to be great individuals. So , why hesitate? Let me have Machine Learning Models and Algorithms for Big Data Classification: Thinking with Examples for Effective Learning (Integrated Series in Information Systems).

Download and Read Online Machine Learning Models and Algorithms for Big Data Classification: Thinking with Examples for Effective Learning (Integrated Series in Information Systems) Shan Suthaharan #PDEBTI713V8

Read Machine Learning Models and Algorithms for Big Data Classification: Thinking with Examples for Effective Learning (Integrated Series in Information Systems) by Shan Suthaharan for online ebook

Machine Learning Models and Algorithms for Big Data Classification: Thinking with Examples for Effective Learning (Integrated Series in Information Systems) by Shan Suthaharan Free PDF d0wnl0ad, audio books, books to read, good books to read, cheap books, good books, online books, books online, book reviews epub, read books online, books to read online, online library, greatbooks to read, PDF best books to read, top books to read Machine Learning Models and Algorithms for Big Data Classification: Thinking with Examples for Effective Learning (Integrated Series in Information Systems) by Shan Suthaharan books to read online.
