## **Timber Construction Manual AITC**

Since its first publication in 1966, Timber Construction Manual has become the definitive design and construction industry source for building with wood, both sawn lumber and structural glued laminated timber. Timber Construction Manual, Fifth Edition features an improved organization of content to provide architects, engineers, contractors, educators, the laminating and fabricating industry, and all others having a need for reliable, up-to-date technical data and recommendations on engineered timber construction with essential knowledge of wood and its application to specific design considerations.

Based on the most reliable technical data available, this defining guide has been thoroughly revised to encompass:

- The latest design procedures for timber construction, featuring thorough updates of all recommended design criteria for timber members, systems, and fasteners
- A simplified design procedure for pitched and tapered curved beams
- An entirely new chapter on Load and Resistance Factor Design (LRFD) and an updated section on the chemical properties of wood
- The latest design and construction codes, including the 2001 National Design Specification for Wood from the National Forest Products Association, AITC 117-2004, and examples featuring ASCE 7-02 and IBC 2003
- More cross-referencing to other available AITC standards and less superfluous full citations result in a leaner book with more useful, up-to-date information

The information and the knowledge you will got here is fresh through the oven so don't be worry if you feel like an outdated people live in narrow community. It is good thing to have Timber Construction Manual because this book offers to your account readable information. Do you at times have book but you would not get what it's about. Oh come on, that won't happen if you have this with your hand. The Enjoyable set up here cannot be questionable, such as treasuring beautiful island. Techniques you still want to miss this? Find this book along with read it from at this point!

#### **Juana Kitchen:**

As a scholar exactly feel bored to reading. If their teacher questioned them to go to the library or to make summary for some reserve, they are complained. Just little students that has reading's soul or real their pastime. They just do what the professor want, like asked to go to the library. They go to at this time there but nothing reading seriously. Any students feel that examining is not important, boring and can't see colorful pics on there. Yeah, it is for being complicated. Book is very important in your case. As we know that on this time, many ways to get whatever you want. Likewise word says, many ways to reach Chinese's country. Therefore , this Timber Construction Manual can make you truly feel more interested to read.
