Bisexual and Homosexual Identities Critical Clinical Issues (Journal of Homosexuality) John Dececco Phd

Are scientists--who by definition are supposed to be objective and clinical in their theories--actually assuming common cultural prejudices and moral standards when it comes to their research on homosexuality? Some of the best minds in sexual liberation take a hard look at how homosexuality is still defined and viewed by established schools of thought and propose fascinating and often controversial ideas on the true nature of the gay personality and identity. This challenging book explores how gay people can "label" themselves or avoid the gay label entirely while still being homosexual, as well as how others label gay people.
