## **How Do You Find an Exoplanet? (Princeton Frontiers in Physics)** John Asher Johnson

Alien worlds have long been a staple of science fiction. But today, thanks to modern astronomical instrumentation and the achievements of many enterprising observational astronomers, the existence of planets outside our solar system--also known as exoplanets--has moved into the realm of science fact. With planet hunters finding ever smaller, more Earth-like worlds, our understanding of the cosmos is forever changed, yet the question of how astronomers make these discoveries often goes unanswered.

*How Do You Find an Exoplanet?* is an authoritative primer on the four key techniques that today's planet hunters use to detect the feeble signals of planets orbiting distant stars. John Johnson provides you with an insider's perspective on this exciting cutting-edge science, showing how astronomers detect the wobble of stars caused by the gravitational tug of an orbiting planet, the slight diminution of light caused by a planet eclipsing its star, and the bending of space-time by stars and their planets, and how astronomers even directly take pictures of planets next to their bright central stars.

Accessible to anyone with a basic foundation in college-level physics, *How Do You Find an Exoplanet?* sheds new light on the prospect of finding life outside our solar system, how surprising new observations suggest that we may not fully understand how planets form, and much more.

### **From reader reviews:**

#### **Howard Kincaid:**

The actual book *How Do You Find an Exoplanet? (Princeton Frontiers in Physics)* will bring that you the new experience of reading the book. The author style to spell out the idea is very unique. If you try to find new book to read, this book very suitable to you. The book *How Do You Find an Exoplanet? (Princeton Frontiers in Physics)* is much recommended to you to see. You can also get the e-book from the official web site, so you can quickly to read the book.

#### **Zachary Foushee:**

Spent a free time to be fun activity to complete! A lot of people spent their sparetime with their family, or their very own friends. Usually they undertaking activity like watching television, going to beach, or picnic inside the park. They actually doing same every week. Do you feel it? Do you need to something different to fill your current free time/ holiday? Can be reading a book could be option to fill your free of charge time/ holiday. The first thing that you ask may be what kinds of book that you should read. If you want to test look for book, may be the guide untitled *How Do You Find an Exoplanet? (Princeton Frontiers in Physics)* can be good book to read. May be it can be best activity to you.

#### **Victoria Austin:**

Your reading 6th sense will not betray an individual, why because this *How Do You Find an Exoplanet? (Princeton Frontiers in Physics)* book written by well-known writer who knows well how to make book which can be understand by anyone who else read the book. Written throughout good manner for you, leaking every ideas and composing skill only for eliminate your current hunger then you still hesitation *How Do You Find an Exoplanet? (Princeton Frontiers in Physics)* as good book but not only by the cover but also with the content. This is one guide that can break don't assess book by its protect, so do you still needing yet another sixth sense to pick this!? Oh come on your reading through sixth sense already told you so why you have to listening to another sixth sense.

#### **Diana Keller:**

Do you like reading a e-book? Confuse to looking for your preferred book? Or your book ended up being rare? Why so many query for the book? But almost any people feel that they enjoy intended for reading. Some people likes looking at, not only science book but in addition novel and *How Do You Find an Exoplanet? (Princeton Frontiers in Physics)* or even others sources were given knowledge for you. After you know how the truly great a book, you feel would like to read more and more. Science book was created for teacher as well as students especially. Those publications are helping them to add their knowledge. In some other case, beside science guide, any other book likes *How Do You Find an Exoplanet? (Princeton Frontiers in Physics)* to make your spare time much more colorful. Many types of book like this.
