Internetworking with TCP/IP, Vol. III: Client-Server Programming and Applications, Linux/Posix Sockets Version Douglas E. Comer, David L. Stevens

Internetworking with TCP/IP, Volume III describes the fundamental concepts of client-server computing used to build all distributed computing systems, and presents an in-depth guide to the Posix sockets standard utilized by Linux and other operating systems. Dr. Douglas E. Comer compares leading server designs, and describes the key tools and techniques used to build clients and servers, including Remote Procedure Call (RPC). The book contains examples of running programs that illustrate each approach. Comer introduces the client-server model and its software design implications; the role of concurrent processing and threads; the Socket API, and differences that impact Linux programmers. Understand the key algorithms and issues associated with client and server software design; then review three leading approaches: iterative, connectionless servers (UPD); and both iterative and concurrent connection-oriented servers (TCP). The book contains extensive coverage of threading, including a new chapter on using threads for concurrency; as well as coverage of single-threaded and multi-threaded concurrent servers. Comer introduces multi-protocol and multi-service services; reviews client concurrency; tunneling at the transport and application levels; and external data representation (XDR). He reviews RPC, distributed program generation, NFS concepts and protocol; Telnet; streaming media transport; and finally, techniques for avoiding deadlock and starvation in client-server systems. For everyone who wants to master TCP/IP and understand how the Internet works.

### From reader reviews:

#### **Peter Cox:**

Often the book Internetworking with TCP/IP, Vol. III: Client-Server Programming and Applications, Linux/Posix Sockets Version will bring that you the new experience of reading a new book. The author style to spell out the idea is very unique. When you try to find new book to see, this book very appropriate to you. The book Internetworking with TCP/IP, Vol. III: Client-Server Programming and Applications, Linux/Posix Sockets Version is much recommended to you to see. You can also get the e-book from the official web site, so you can quickly to read the book.

## **Oliver Crites:**

Reading a guide tends to be new life style on this era globalization. With studying you can get a lot of information that will give you benefit in your life. Along with book everyone in this world could share their idea. Ebooks can also inspire a lot of people. Plenty of author can inspire their particular reader with their story or perhaps their experience. Not only the storyline that share in the textbooks. But also they write about the ability about something that you need example. How to get the good score toefl, or how to teach children, there are many kinds of book that you can get now. The authors these days always try to improve their ability in writing, they also doing some exploration before they write to the book. One of them is this Internetworking with TCP/IP, Vol. III: Client-Server Programming and Applications, Linux/Posix Sockets Version.

## **Jerry Gunnell:**

The publication with title Internetworking with TCP/IP, Vol. III: Client-Server Programming and Applications, Linux/Posix Sockets Version posesses a lot of information that you can find out it. You can get a lot of help after read this book. This kind of book exist new knowledge the information that exist in this publication represented the condition of the world now. That is important to yo7u to find out how the improvement of the world. This specific book will bring you inside new era of the the positive effect. You can read the e-book on the smart phone, so you can read this anywhere you want.

#### **Carolyn Cook:**

People live in this new morning of lifestyle always attempt to and must have the spare time or they will get wide range of stress from both everyday life and work. So, once we ask do people have extra time, we will say absolutely without a doubt. People is human not really a huge robot. Then we consult again, what kind of activity do you have when the spare time coming to you of course your answer will certainly unlimited right. Then ever try this one, reading publications. It can be your alternative inside spending your spare time, the actual book you have read is usually Internetworking with TCP/IP, Vol. III: Client-Server Programming and Applications, Linux/Posix Sockets Version.
