Doctors in Denial: How the Canadian medical profession has been captured by Big Pharma Joel Lexchin

Doctors in Denial examines the relationship between the Canadian medical profession and the pharmaceutical industry, and explains how doctors have become dependents of the drug companies instead of champions of patients' health. Big Pharma plays a role in every aspect of doctors' work. These giant, wealthy multinationals influence how medical students are trained and receive information, how research is done in hospitals and universities, what is published in leading medical journals, what drugs are approved, and what patients expect when they go into their doctors' offices. But almost all doctors deny the influence and control the drug companies exert. In this book Dr. Lexchin urges the medical profession to make the changes needed to give priority to protecting and promoting patients' health and benefitting society, rather than enabling Big Pharma to dominate health care while raking in billions in profits from citizens and governments.
