Windows Admin Scripting Little Black Book (Little Black Books (Paraglyph Press)) Jesse M. Torres

Windows Admin Scripting Little Black Book, 3rd Edition, shows Windows users and administrators how to perform Windows management and administrative tasks using powerful scripts for just about every important task imaginable. It covers techniques for working with files, input/output, text files, and performing various network administrative tasks through scripting. It presents the necessity of logon scripts, the backbone structure of a good logon script, and how to implement these scripts in an everyday environment to automate repetitive tasks such as inventory, file modifications, installations, and system updates. It also provides an in-depth look into the registry and registry editing tools including locating the important registry keys and values, and modifying them.

The book features example scripts on every new topic covered to reinforce what the reader has just learned. Key scripting topics include manipulating the Windows XP file system, using powerful third-party scripting tools, creating scripts for installing service packs and new applications, automating applications from the command line, and setting up security features for Windows XP. Everything is included in this book, and users can easily modify or combine the scripts to perform myriad tasks. And the author has included all the scripts on his website for easy reference.
