NASONEX Nasal Spray: Treats or Prevents Symptoms of Allergies (Hay Fever) and Nasal Polyps

James Lee Anderson

“Although, your health condition may impact your everyday life, do not let it define who you are.”

NASONEX® (mometasone furoate) Nasal Spray is used to treat and prevent the symptoms (e.g., stuffy or runny nose, itching sneezing) of seasonal (short-term) and perennial (year-round) allergic rhinitis (hay fever).

This medicine is also used to treat nasal polyps in adults. Mometasone belongs to the family of medicines known as corticosteroids (cortisone-like medicines). It works by preventing certain cells from releasing substances that cause an allergic reaction. This medicine is available only with your doctor's prescription.

Thanks and may you have a good understanding about this drug—NASONEX®. You may want to share this book with your family and friends who may be in need of help and would want to use this medicine. Take care, and as always, be well!
