**The World of Biological Molecules Through the Eyes and Hands of Undergraduate Students** PhD Tang Hu, PhD Laura Mudd

This book was written by undergraduate students majoring in biology and chemistry. Based on one of the biomedical research activities they completed in academic labs, each author (student) wrote one essay/story in non-scientific language. These very personal and meaningful essays/stories not only reflect their critical thinking ability, understanding of important biological molecules, and creativity, but also show their extracurricular activities, campus life, and their general knowledge of the world around them.
