Twisted True Tales From Science: Medical Mayhem Stephanie Bearce

Ground up mummy bones, dried toads tied around the neck, and a morning breakfast of lice and pee. It sounds like a horror movie but those are actual medicines prescribed by early doctors. Medical students studied anatomy on bodies stolen from graves, and had to operate on people while they were awake. Learn about the medicines that came from poison and doctors who experimented on themselves and their families. It's a twisted tale of medical mayhem, but it's all true!
