**Algorithms Sequential and Parallel: A Unified Approach** Russ Miller, Laurence Boxer

For a one-semester, junior/senior-level course in Algorithms. Attuned to the rapidly changing landscape in computer technology, this unique and very progressive text helps students understand the application and analysis of algorithmic paradigms to both the traditional sequential model of computing and to a variety of parallel models-offering a unified, fully integrated coverage of both model types so that students can learn to recognize how solution strategies may be shared among computer paradigms and architectures.
