## **Laser Shock Peening: Performance and Process Simulation (Woodhead Publishing Series in Metals and Surface Engineering) K Ding, L Ye**

Laser shock peening (LSP) is a relatively new surface treatment for metallic materials. LSP is a process to induce compressive residual stresses using shock waves generated by laser pulses. LSP can greatly improve the resistance of a material to crack initiation and propagation brought on by cyclic loading and fatigue. This pioneering book was the first of its kind to consolidate scattered knowledge into one comprehensive volume. It describes the mechanisms of LSP and its substantial role in improving fatigue performance in terms of modification of microstructure, surface morphology, hardness and strength. In particular it describes numerical simulation techniques and procedures which can be adopted by engineers and research scientists to design, evaluate and optimise LSP processes in practical applications.

- Provides for the first time, a comprehensive coverage of this important area
- Written by two world renowned experts

### **From reader reviews:**

#### **Willie Collier:**

A lot of people always spent their free time to vacation as well as go to the outside with them family members or their friend. Do you realize? Many a lot of people spent they will free time just watching TV, or playing video games all day long. If you want to try to find a new activity this is look different you can read a book. It is really fun in your case. If you enjoy the book which you read you can spent the whole day to reading a book. The book Laser Shock Peening: Performance and Process Simulation (Woodhead Publishing Series in Metals and Surface Engineering) it doesn't matter what good to read. There are a lot of individuals who recommended this book. These folks were enjoying reading this book. When you did not have enough space to develop this book you can buy the particular e-book. You can m0ore easily to read this book out of your smart phone. The price is not too expensive but this book features high quality.

#### **Robert Irizarry:**

Your reading 6th sense will not betray you actually, why because this Laser Shock Peening: Performance and Process Simulation (Woodhead Publishing Series in Metals and Surface Engineering) reserve written by well-known writer who really knows well how to make book that could be understand by anyone who all read the book. Written in good manner for you, still dripping wet every ideas and publishing skill only for eliminate your hunger then you still doubt Laser Shock Peening: Performance and Process Simulation (Woodhead Publishing Series in Metals and Surface Engineering) as good book but not only by the cover but also with the content. This is one book that can break don't evaluate book by its handle, so do you still needing an additional sixth sense to pick this kind of!? Oh come on your examining sixth sense already alerted you so why you have to listening to one more sixth sense.

#### **Shawn Clay:**

You can get this Laser Shock Peening: Performance and Process Simulation (Woodhead Publishing Series in Metals and Surface Engineering) by browse the bookstore or Mall. Simply viewing or reviewing it might to be your solve difficulty if you get difficulties for your knowledge. Kinds of this reserve are various. Not only through written or printed and also can you enjoy this book by e-book. In the modern era including now, you just looking because of your mobile phone and searching what your problem. Right now, choose your current ways to get more information about your e-book. It is most important to arrange yourself to make your knowledge are still upgrade. Let's try to choose appropriate ways for you.

#### **William Reyes:**

Reserve is one of source of knowledge. We can add our expertise from it. Not only for students but in addition native or citizen require book to know the change information of year for you to year. As we know those ebooks have many advantages. Beside we add our knowledge, also can bring us to around the world. From the book Laser Shock Peening: Performance and Process Simulation (Woodhead Publishing Series in

Metals and Surface Engineering) we can take more advantage. Don't that you be creative people? To get creative person must choose to read a book. Just choose the best book that suited with your aim. Don't always be doubt to change your life at this book Laser Shock Peening: Performance and Process Simulation (Woodhead Publishing Series in Metals and Surface Engineering). You can more desirable than now.
