European Agriculture: Policies, Production and Trade

Brian Gardner

European Agriculture: Policies, Production and Trade Brian Gardner

The Common Agricultural Policy (CAP) is central to both economic and environmental developments in Europe. But with the advent of new environmental legislation and political change in Europe the CAP faces increasing pressure to reform.

European Agriculture provides a comprehensive breakdown of the workings of the CAP and its impact on farming in Europe. The author discusses every aspect of European agricultural policy, production and trade, from environmental constraints and the impact of biotechnology, to the role of European farming in the world food supply system.

Posing direct questions about the recent 1992 agricultural reform, the 1994 GATT agreement and the reasons for the expensive continuation of the CAP, *European Agriculture* analyses the economic, political and environmental implications of pursuing present farming policy and provides a provocative commentary on the agricultural future of Europe.
