**Heat Transfer in Condensation and Boiling (International Series in Heat and Mass Transfer) Karl Stephan**

I welcome the opportunity to have my book translated, because of the great emphasis on two-phase flow and heat transfer in the English-speaking world, as related to research, university education, and industrial practice. The 1988 Springer-Verlag edition of "Warmeübergang beim Kondensieren und beim Sieden" has been enlarged to include additional material on falling film evaporation (Chapter 12) and pressure drop in two-phase flow (Chapter 13). Minor errors in the original text have also been corrected. I would like to express my sincere appreciation to Professor Green, Associate Professor of German at Rensselaer, for his excellent translation and cooperation. My thanks go also to Professor Bergles for his close attention to technical and linguistic details. He carefully read the typescript and made many comments and suggestions that helped to improve the manuscript. I hope that the English edition will meet with a favorable reception and contribute to better understanding and to progress in the field of heat transfer in condensation and boiling. February 1992 K. Stephan Preface to the German-Language Edition This book is a continuation of the series "Heat and Mass Transfer" edited by U. Grigull, in which three volumes have already been published. Its aim is to acquaint students and practicing engineers with heat transfer during condensation and boiling, and is intended primarily for students and engineers in mechanical, chemical, electrical, and industrial processing engineering.

### **From reader reviews:**

#### **Kenneth Handy:**

As people who live in often the modest era should be revise about what going on or information even knowledge to make these individuals keep up with the era and that is always change and move forward. Some of you maybe will update themselves by reading books. It is a good choice for you but the problems coming to you actually is you don't know what type you should start with. This Heat Transfer in Condensation and Boiling (International Series in Heat and Mass Transfer) is our recommendation to make you keep up with the world. Why, since this book serves what you want and want in this era.

#### **Cynthia Bryant:**

Do you considered one of people who can't read gratifying if the sentence chained from the straightway, hold on guys this kind of aren't like that. This Heat Transfer in Condensation and Boiling (International Series in Heat and Mass Transfer) book is readable by simply you who hate the straight word style. You will find the facts here are arrange for enjoyable studying experience without leaving also decrease the knowledge that want to give to you. The writer of Heat Transfer in Condensation and Boiling (International Series in Heat and Mass Transfer) content conveys prospect easily to understand by many people. The printed and e-book are not different in the content but it just different as it. So , do you even now thinking Heat Transfer in Condensation and Boiling (International Series in Heat and Mass Transfer) is not loveable to be your top list reading book?

#### **Donna Solano:**

The book untitled Heat Transfer in Condensation and Boiling (International Series in Heat and Mass Transfer) is the book that recommended to you to study. You can see the quality of the guide content that will be shown to an individual. The language that publisher use to explained their ideas are easily to understand. The author was did a lot of study when write the book, and so the information that they share to you is absolutely accurate. You also will get the e-book of Heat Transfer in Condensation and Boiling (International Series in Heat and Mass Transfer) from the publisher to make you more enjoy free time.

#### **Paulette Preston:**

Reading a book to get new life style in this year; every people loves to learn a book. When you study a book you can get a lot of benefit. When you read publications, you can improve your knowledge, since book has a lot of information in it. The information that you will get depend on what sorts of book that you have read. If you wish to get information about your examine, you can read education books, but if you act like you want to entertain yourself you can read a fiction books, these us novel, comics, in addition to soon. The Heat Transfer in Condensation and Boiling (International Series in Heat and Mass Transfer) provide you with a new experience in examining a book.
